- SICHERER SCHRAUBVERSCHLUSS

Français

Suite à un accord conclu en 1956, entre l'Allemagne, l'Italie et la France, un groupe de travail élabora les spécifications d'un char moyen. L'Allemagne et la France travaillent sur le même projet, et après les essais un prototype doit revenir à chaque pays. En 1963, suite à des essais tripartites de 10 chars, c'est l'échec de l'accord, et chaque pays décide de construire son propre matériel. L'Allemagne construit son Léopard 1, et la France son propre AMX30. Les premiers engins sortent de l'Atelier de Construction de Roanne (entreprise gouvernementale) en 1963, et sont mis en service l'année suivante pour remplacer progressivement le M47 (américain). L'AMX30 est un assemblage d'acier coulé et corroyé, la tourelle est coulée d'une seule pièce. Il est équipé d'un moteur Hispano-Suiza de 720 cv. L'équipage se compose de quatre hommes. Le chauffeur est assis à l'avant gauche, les trois autres membres de l'équipage (le chef de char, le canonnier et le pourvoyeur) sont installés dans la tourelle.

Poids total en ordre de combat	36 tonnes
Longueur	9,48 m
Largeur	3,10 m
Hauteur	2,86 m
Vitesse maximale sur route	65 km/h
Autonomie	650 km

English

Following an agreement concluded in 1956 between Germany, Italy and France, a work group elaborated the specifications for a standard European tank. Germany and France worked together on the same project and after a series of tests a prototype was to be given to each of the countries concerned. However, in 1963, after tri-partite tests, the agreement was cancelled and each country decided to construct its own tank. Germany developed the Leopard 1 and France its AMX30. The first tanks rolled off the production line of Roanne (government industry) in 1966 and were entered into service the following year to progressively replace the American M47. The AMX30 is an assembly of cast and refined steel. Its turret is cast in one single piece. It is equipped with a 720 horsepower Hispano-Suiza engine. The crew consists of four men. The driver is seated front left while the other three crew members are seated in the turret (the tank commander, the gunner and the artillery man).

Total combat weight	36 tons
Length	9,48 m
Width	3,10 m
Height	2,86 m
Max. road speed	40 mph
Autonomous range	403 miles

Deutsch

Nach einem 1956 zwischen Deutschland, Italien und Frankreich geschlossenen Abkommen erarbeitete eine Arbeitsgruppe die Spezifikationen für einen europäischen Standardpanzer. Deutschland und Frankreich arbeiteten gemeinsam an demselben Projekt und nach einer Reihe von Tests sollte jedem der betroffenen Länder ein Prototyp ausgehändigt werden. 1963 wurde das Abkommen jedoch nach dreiseitigen Tests aufgehoben und jedes Land beschloss, seinen eigenen Panzer zu bauen. Deutschland entwickelte den Leopard 1 und Frankreich seinen AMX30. Die ersten Panzer liefen 1966 in Roanne (staatliche Industrie) vom Band und wurden im folgenden Jahr in Dienst gestellt, um den amerikanischen M47 schrittweise zu ersetzen. Der AMX30 ist eine Baugruppe aus gegossenem und veredeltem Stahl. Sein Turm ist aus einem einzigen Stück gegossen. Er ist mit einem Hispano-Suiza-Motor mit 720 PS ausgestattet. Die Besatzung besteht aus vier Männern. Der Fahrer sitzt vorne links, während die anderen drei Besatzungsmitglieder im Turm sitzen (der Panzerkommandant, der Schütze und der Artillerist).

Gesamtgewicht, kampfbereit	36 Tonnen
Länge	9,48 m
Breite	3,10 m
Höhe	2,86 m
Höchstgeschwindigkeit auf Straßen	65 km/h
Reichweite	650 km

In seguito a un accordo concluso nel 1956 tra Germania, Italia e Francia, un gruppo di lavoro elaborò le specifiche per un carro armato europeo standard. Germania e Francia lavorarono insieme allo stesso progetto e dopo una serie di test un prototipo doveva essere consegnato a ciascuno dei paesi interessati. Tuttavia, nel 1963, dopo test tripartiti, l'accordo fu annullato e ogni paese decise di costruire il proprio carro armato. La Germania sviluppò il Leopard 1 e la Francia il suo AMX30. I primi carri armati uscirono dalla linea di produzione di Roanne (industria governativa) nel 1966 e furono messi in servizio l'anno successivo per sostituire progressivamente l'americano M47. L'AMX30 è un assemblaggio di acciaio fuso e raffinato. La sua torretta è fusa in un unico pezzo. È equipaggiato con un motore Hispano-Suiza da 720 cavalli. L'equipaggio è composto da quattro uomini. Il conducente è seduto davanti a sinistra mentre gli altri tre membri dell'equipaggio sono seduti nella torretta (il comandante del carro armato, il cannoniere e l'artigliere).

Peso totale in combattimento	36 tonnellate
Lunghezza	9,48 m
Larghezza	3,10 m
Altezza	2,86 m
Velocità massima su strada	65 km/h
Autonomia	650 km

Nederlands

Naar aanleiding van een overeenkomst die in 1956 werd gesloten tussen Duitsland, Italië en Frankrijk, ontwikkelde een werkgroep de specificaties voor een standaard Europese tank. Duitsland en Frankrijk werkten samen aan hetzelfde project en na een reeks tests zou aan elk van de getroffen landen een prototype worden gegeven. In 1963, na tripartiete tests, werd de overeenkomst echter afgeschaft en besloot elk land zijn eigen tank te bouwen. Duitsland ontwikkelde de Leopard 1 en Frankrijk de AMX30. De eerste tanks rollen in 1966 van de lopende band in Roanne (staatsbedrijf) en kwamen het jaar daarop in dienst om geleidelijk de Amerikaanse M47 te vervangen. De AMX30 is een gegoten en verfijnd staal samenstel. De toren is uit één stuk gegoten. Hij is uitgerust met een Hispano-Suiza-motor met 720 pk. De bemanning bestaat uit vier man. De bestuurder zit links vooraan, terwijl de andere drie bemanningsleden in de koepel zitten (de tankcommandant, de schutter en de artillerist).

Totaal gewicht, klaar voor de strijd	36 ton
Lengte	9,48 m
Breedte	3,10 m
Hoogte	2,86 m
Maximale snelheid op wegen	65 km/u
Actieradius	650 km

- Si aucune teinte n'est spécifiée, peindre dans les couleurs de la version choisie. Se reporter aux pages 18 & 19 pour le détail du schéma de peinture.
- When no color is specified, paint the item with colors of chosen version. Refer to pages 18 & 19 for painting pattern.
- Wenn keine Farbe angegeben ist, Teile mit den Farben der gewählten Version bemalen. Beachten Sie die Seiten 18 & 19 für die Lackierung und Markierung.
- Cuando ningún color es especificado, pintar con los colores del tema de la versión elegida. Vea las páginas 18 & 19 para obtener detalles de pintura.
